

Author and Revit Architecture expert Eric Wing walks you through designing, documenting, and presenting a four-story office building. The continuous tutorial begins with the Revit interface and standard conventions for placing walls, doors, and windows, then progresses through the buildings design as would happen in the real world. You'll learn how to work with structural grids, beams, and foundations; add text and dimensions; build floors layer by layer; join exterior and interior walls; and create roofs and ceilings as well as stairs, ramps, and railings. You'll also be introduced to using embedded families and formulas, crucial site considerations, and importing and exporting to various formats. For Instructors: Teaching supplements are available for this title.

Diary of Steve in a Blocky Universe Volume 1 (3 Trilogies = 9 books in 1): An Unofficial Minecraft Book for Kids Age 9-12, How to be Assertive In Any Situation, Carnegie.
