Porcupines of the world, references, tables, common and scientific names, index with b&w illustrations throughout. Smithsonian Nature Books Series, No. 8: First Edition, 1989. Orange cloth with gilt lettering to spine. The author has written the first comprehensive natural history of *Erethizon dorsatum*, the North American porcupine. Drawing on a profound fascination with the species and the region as well as professional training in biology and biochemistry, he uses his own observations and results of radio telemetry to describe social and territorial relationships, mating and parental behavior, an unusual dispersal pattern, and infamous defense system that in fact depends on quills only as a last resort. from the jacket flap.
