

This reproduction was printed from a digital file created at the Library of Congress as part of an extensive scanning effort started with a generous donation from the Alfred P. Sloan Foundation. The Library is pleased to offer much of its public domain holdings free of charge online and at a modest price in this printed format. Seeing these older volumes from our collections rediscovered by new generations of readers renews our own passion for books and scholarship.

Learn about the different types of soil, how to tell what type of soil you have, and the basics of amending your soil on the small farm. Willamette Valley Soil Quality Score Card Guide & Score Card - Farmers and other land managers need reliable methods to assess soil quality so they can. Soils are made up of four basic components: Sand, Silt, Clay and Organic Matter. Basic information about their make up in your soil can be found in the Soil. The impacts of any particular farming practice on soil life depends on interactions with soil type and other site specific factors. Of course, most of these practices. Over the next few weeks we'll look at repairing the damage done to our soils through poor farming practices. Soil mainly consists of sand. Resolve to improve the health of your soil this year.
